

# FOLK REALISM:

*Corrected figures*

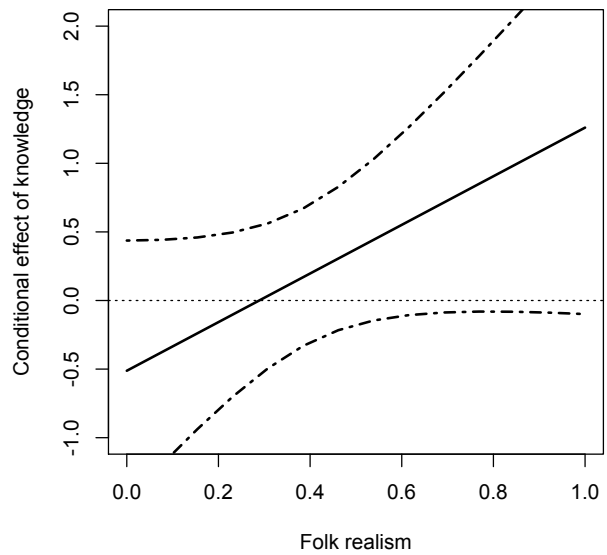

January 14, 2013

Due to an author error, the published version of the article contains incorrect versions of Figures 1-3. The correct versions are shown below.

Figure 1: Political knowledge's moderating effect for NK

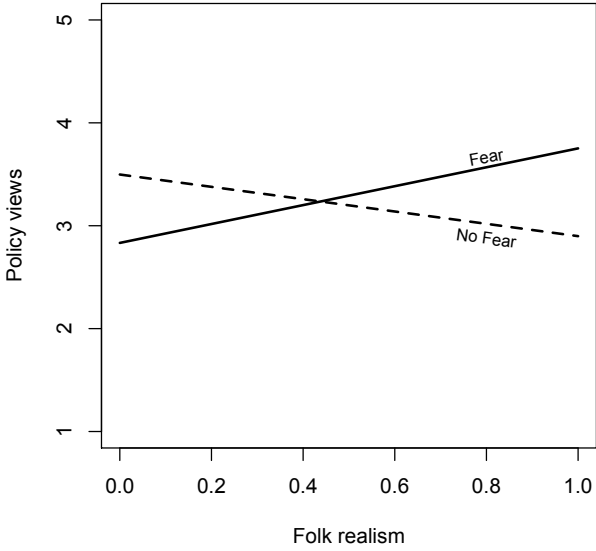

(a) Knowledge's polarizing effect ( $p < 0.096$ )

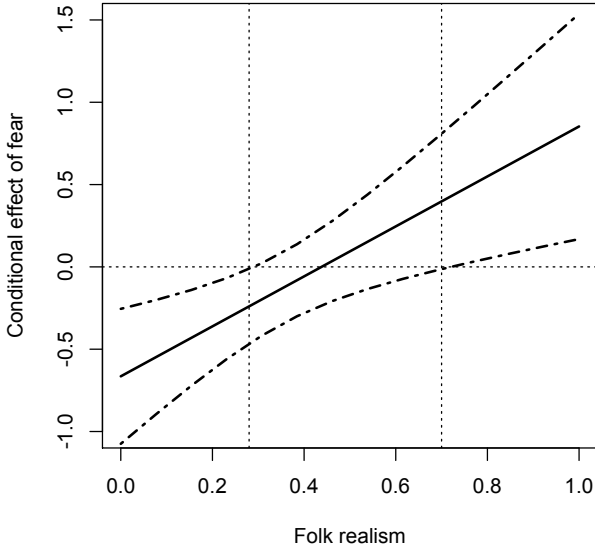

(b) Conditional effect with 95% CIs

The last sentence of footnote 15 on p. 253 should read “Thus, in Figure 2(b), the conditional effect is significant for all values of folk realism below 0.29 and above 0.72.”

Figure 2: Fear's moderating effect for Iraq

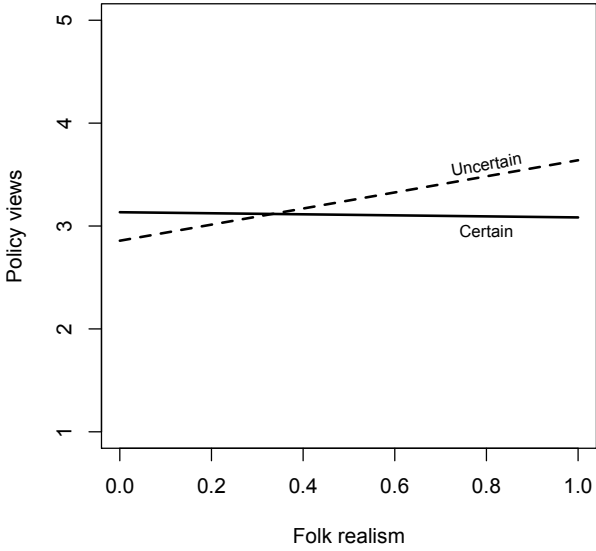

(a) Fear's polarizing effect ( $p < 0.003$ )

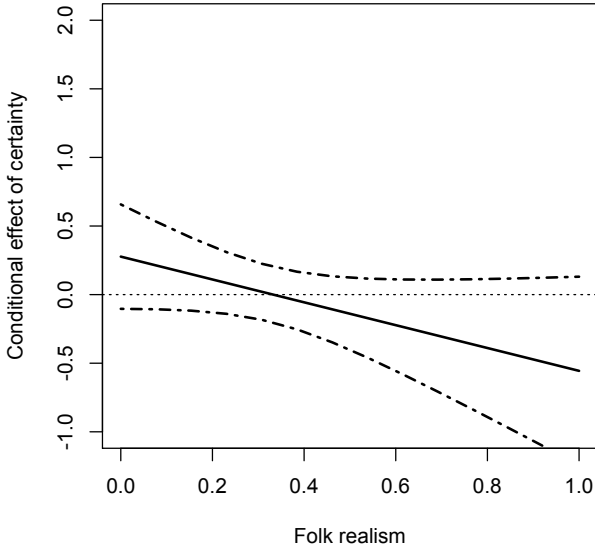

(b) Conditional effect with 95% CIs

Figure 3: Uncertainty's polarizing effect for Iraq

(a) Uncertainty's polarizing effect, ( $p < 0.098$ )

(b) Conditional effect with 95% CIs
